- ( Pipe included with complete welded assemblies only )

**S610XXXAXX03**  
(shown as complete assembly in aluminum)

### Optional Hasp (sold seperately)

**943886**

### Available hinge butt options with our security hinge pin.

**913534**

**913550**

### Security Hinge Pin

A. L. Hansen's security hinge pin provides added security, improved appearance and reduced maintenance. Our security hinge pin has a washer which is formed as part of the pin. This allows us to provide a flush hinge pin, eliminate unsightly welds or stake marks and rule out any possibility of removing the pin by riving it thru the hinge. our free flow finish is a standard feature on virtually all of our steel hinges. It provides more than 500 hours of salt spray protection and reduces the need for zerks and bronze bushings. This is achieved by a process of applying a blend of solid film lubricants in a heat cured, organic resin binder, leaving a thin, dry bonded lubricating coating.
